Images Collection

1) Database: https://rooms-db.ailed.ai/

Username=ailed-user
Password=EQQr]kW[GcGk[dIT

There are two databases ailed-db1 and ailed-db2

SQL Query to return data:
```
SELECT * FROM `response_questionnaires_detail` as rqd inner join questionnaire_questions as qq on rqd.questionnaire_question_id = qq.id;
```

Questionnaires contain questions that a user answers, Answers are stored in the response detail. If the question type is image (3), then the response field contains the S3 path to the stored image.

The question "image_list" (7) will include response_questionnaires_detail_objects which will have collection of images for one question.
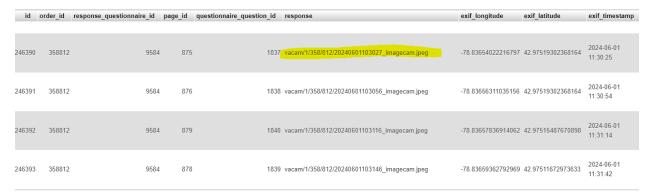

Git Project for the following URL:

git@github.com:stellainternational/ailed-rooms.git

This page uses S3 and Amazon SDK to retrieve encrypted data from bucket and display as an image.
